

Hand Net Hauler

HAND NET HAULER TYPE HHL-03

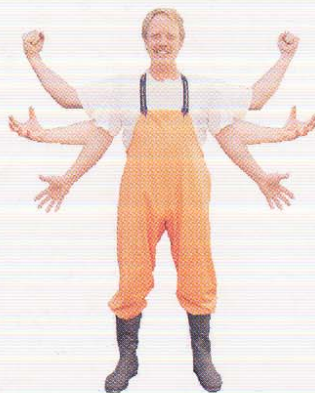

The Hand Net Hauler is a special tool designed to lift the dead fish haul which installs on the workboat.

- **QUALITY ASSURANCE** - The Hand Net Hauler makes it possible to recover dead fish quickly and efficiently. Dead fish are pulled right into the boat in just 1 minute. Equip your farm to handle large quantities of dead fish in case of crisis.
- **AREAS OF USE** - Sinkers, moorings, mooring tensioners, float-lines, net replacement.
- **USER-FRIENDLY** - The farmer is spared undue strain from heavy lifts.
- **MOBILE** - The hauler is fitted onboard the workboat and can be used all around the farm.

The Hand Net Hauler pivots on a slew post and is intended for mounting onboard the workboat. It is controlled from a valve panel mounted directly on the hydraulic motor of the hauler. Units are supplied with a 4 m hose as standard.

Max pull net haul: 300 kg
Speed: 60 rpm
Lift speed: 43 m/min
Oil volume: 12 l/min
Oil pressure: 140 bar

**Extra Power
for Fish Farming**
